**PRESENTED BY:**  
**Dr. Trevor Bullock**

Regen Orthopedics  
Hillcrest Hospital  
6780 Mayfield Road, Suite 415  
Mayfield Heights, Ohio 44124  
(844) 786-2355

**Wednesday, September 14th, 2016**

**5:00 pm Dinner will be served**

**5:30 pm Presentation will begin**

Learn more about alternatives for chronic pain and how regenerative medicine is changing the game in orthopedic care. Regenerative medicine is a non-surgical therapy that enables your own adult stem cells to repair injured tissues, reduce inflammation and stop pain. It has been highly effective in treating chronic pain caused from arthritis as well as joint or nerve injuries. Regenerative medicine is an alternative for those who are looking to avoid surgery, prolong the need for surgery, or who just may not be a candidate for surgery. Patients also turn to this treatment as a way to avoid ongoing steroid treatment for pain.

*RSVP to Lacie Cork at (330) 688-8600 or [lcork@sprengerhealthcare.com](mailto:lcork@sprengerhealthcare.com)*

**Public Welcome • No Participation Fee**

PRESENTATION WILL BE HELD AT:

*Heather Knoll Nursing & Rehabilitation  
1134 North Avenue  
Tallmadge, Ohio 44278*
